Motivated and detail-oriented Software Engineer with hands-on experience across the software development lifecycle, from designing scalable architectures to building responsive websites, dashboards, and full-stack applications. Proficient in modern web technologies, with solid understanding of clean architecture, API integration, authentication systems, and user interface design. Experienced in collaborating with cross-functional teams to deliver scalable and maintainable software solutions. Demonstrates adaptability through diverse roles, including full-stack development, research engineering, and implementation support in the banking sector. Passionate about solving real-world problems through technology and continuously growing as a well-rounded software engineer.

WORK EXPERIENCES

Beyondtech (PT Adisena Mitra Usaha) - Jakarta Barat

Nov 2024 - Present

Frontend Developer

- Developed and designed responsive Landing Pages for BeyondTech and Starvalas with a modern UI aligned to branding needs.
- Built Merchant Dashboards for external clients to manage transactions, reports, and various business-related features.
- Created internal admin dashboards to support company operations, including data management and activity monitoring.
- Implemented a wide range of interactive and functional features such as authentication, data management, API integration, and information visualization.
- Collaborated closely with backend developers to ensure smooth API integration and deliver an optimal user experience.
- Contributed to improving the performance, maintainability, and usability of web applications.

HUMIC (Human Centric) Engineering Research Center - Bandung

Jul 2023 - Oct 2023

Frontend Developer

- Designed and developed intuitive and responsive Web User Interfaces.
- Translated UI/UX designs into functional and scalable Web Applications.
- Integrated RESTful APIs to ensure seamless data flow between frontend and backend.
- Implemented secure Authentication and Authorization features.
- Developed CRUD functionalities.

PT Bank Mandiri (Persero) Tbk. - Bandung

Apr 2023 - Jun 2023

Implementation Support

- Explained and presented independent banking products, with a focus on Kopra Cash Management, to clients.
- Conducted client training and product demonstrations, ensuring proper understanding and effective usage of Kopra Cash Management.
- Processed and managed customer data using Microsoft Excel to support business operations.

EDUCATION LEVEL

Telkom University - Bandung

Sep 2020 - Aug 2024

Bachelor of S1 Informatics, 3.30/4.00

PROJECT

Jajanin - Creator Donation & Tipping Platform

Jun 2026 - Present

Frontend Developer | *SvelteKit, TypeScript, Tailwind CSS, RSA/HMAC Signature Authentication*

A full-featured donation and tipping platform for content creators and streamers, similar to Saweria/Trakteer. Built the entire frontend client application using a clean MVVM architecture with Repository, Remote Data Source, and reactive State layers.

- Developed the creator dashboard covering real-time donation reports, account statements, withdrawal management, and profile settings.
- Built the admin panel with creator management (activate/suspend), platform-wide donation reports, account statements, withdrawal approval/rejection workflows, and settlement batch processing.

- Implemented RSA-SHA256 (Auth Signature) and HMAC-SHA512 (Service Signature) request signing on the BFF layer following the backend's security specification.
- Designed a session management system with automatic token refresh based on user activity detection and session expiration handling.
- Created a reusable component library including server-side paginated data tables, summary cards, and toast notifications.
- Integrated role-based access control (creator vs admin) with server-side route guards and automatic redirection.
- Built the public-facing donation page with dynamic creator profiles fetched from the API.
- Implemented real-time OBS overlay configuration for donation alerts, media share, subathon timers, QR codes, leaderboards, and running text.

Dashboard Merchant

Nov 2024 - Present

Frontend Developer

A web-based dashboard application built to facilitate disbursement transactions for merchants. Developed using SvelteKit with a Clean Architecture approach and Object-Oriented Programming (OOP) principles to ensure scalability, maintainability, and clear separation of concerns.

Dashboard Internal

Nov 2024 - Present

Frontend Developer

An internal admin dashboard developed to support company operations and data management. Built with SvelteKit using Clean Architecture and Object-Oriented Programming (OOP) principles, ensuring a modular and maintainable system.

Beyondtech Company Profile

Nov 2024 - Present

Frontend Developer

A responsive company profile website developed to showcase BeyondTech's brand, services, and products. The website was built using React.js, ensuring a modern, fast, and interactive user experience. The design emphasizes clean UI, mobile responsiveness, and seamless navigation to provide visitors with easy access to company information.

Melanoma Skin Detection Website

Jul 2023 - Oct 2023

Frontend Developer

A web-based application designed to assist in the early detection of skin cancer (Melanoma and Basal Cell Carcinoma). The system utilizes hybrid transfer learning models (MobileNetV2, VGG16, and DenseNet) for feature extraction, combined with an SVM classifier for accurate diagnosis. Users can upload skin lesion images, and the system will classify them as Melanoma, BCC, or Normal skin. The project integrates a Flask backend with machine learning models and a React.js frontend for user interaction.

CERTIFICATION

MOS Excel 2019 Associate

6 September 2024

Microsoft Office Specialist (MOS) certification for Excel 2019 at the Associate level, validating core-to-intermediate competency in data processing, formulas, and spreadsheet functions in Microsoft Excel.

Lembaga Pelatihan Kerja Bidang Sistem Pembayaran dan Pengelolaan Uang Rupiah - LPPI

5 - 7 November 2025

Competency-based training in the payment system and rupiah currency management field, qualification level Pelaksana 4, sub-field of fund transfer management for non-bank institutions.

SKILL AND ACHIEVEMENT

Hard Skills: NextJS, SvelteKit, TailwindCSS, Javascript, Typescript

Soft Skills: Collaboration, Discipline, Time Management, Critical Thinking, Problem Solving
